Capacitors For Induction Equipment

PRODUCTION PROGRAM

"NF" = Line frequency 50/60Hz : 200 - 3000V

"MF" = Medium frequency 100 - 100000Hz : 100 - 3000V

TRADE NAMES

ESTAdry = MKP-type capacitor, dry,
use at line frequency 50/60Hz,
voltage range 200 up to 1000V.

ESTAprop = MKP-type capacitor, impregnated,
use at line frequency 50/60Hz,
voltage range 200 up to 1000V.

ESTAfilm = all-film capacitor, impregnated,
use at line frequency 50/60Hz,
voltage range 800 up to 3000V
medium frequency, all ranges.

STANDARDS

EN 60110-1/-2 applicable for frequencies
IEC 60110-1 up to 50000Hz.

ESTA capacitors for frequencies > 50000Hz are manufactured
and tested in accordance with these standards, because
no standard exists for this frequency range.

TESTING/QUALITY

Before shipping, each capacitor unit is subjected to the
following tests:-

- leakage from the capacitor casing
- leakage from the cooling tubing
- capacitance measurement
- loss factor measurement
- dielectric test between terminals
- dielectric test between terminals and casing
(for capacitors with insulated casing)

Customer-specific tests can be carried out upon agreement.

QUALITY ASSURANCE SYSTEM ISO 9001

Power capacitors for induction furnaces (furnace capacitors)
cannot be provided with the CE-marking because they
are not included in the scope of the European Community
guidelines according to the EU Commission's manual.

RATING LIMITS

Voltage : U_N continuous,
 $1.05 \times U_N$ up to 12 hours per day.

Current : $1.2 \times I_N$ permanent for $f_N \leq 60\text{Hz}$.
 $1.15 \times I_N$ for $f_N > 60\text{ Hz}$

Temperature: Self-cooling ESTAprop®/ESTAdry: - 25/45°C
Self-cooling ESTAfilm®: - 25/40°C
Liquid cooled ESTAprop®/ESTAfilm®:
outflowing coolant: 40°C
ambient air: 50°C
For specific data, refer to 'Cooling methods'.

COOLING METHODS

SELF-COOLING (AN)

Cooling is obtained by natural air circulation. The ambient
air temperature shall not exceed 40°C (unless otherwise
specified). It is measured at the warmest spot of the capacitor
bank in the center of the clearance between two units at 2/3
of the height of the capacitor casings.

FORCED VENTILATION (AF)

Cooling air is directed forcefully onto the individual capacitor
casings, e.g. by means of ventilators. During continuous
operation, the maximum temperature of the outflowing air
shall not exceed 40°C.

LIQUID COOLING (WF)

The liquid (usually water) cools the capacitor either at the
surface or inside the casing. Maximum temperature of the
outflowing cooling liquid shall not exceed 40°C, while the
temperature of the ambient air shall not exceed 50°C.

REMARKS ON WATER COOLING

COOLING WATER QUALITY

- mechanically pure (mesh size 0.38mm)
- chemically neutral
- carbonate hardness 8°DH maximum
- electrical conductivity 500µS/cm maximum

MAXIMUM PERMISSIBLE INDIVIDUAL VALUES

	With carbonate hardness	8°DH	6°DH	4°DH
PH value	7.8	8.1	8.3	
Free carbon dioxide (CO ₂)	8mg/l	4mg/l	3mg/l	
Aggressive carbon dioxide	not permitted			
Ammonia (NH ₃)	not permitted			
Nitrides (NO ₂)	0.04mg/l			
Iron	0.3mg/l			
Manganese	0.05mg/l			
Sulfates	250mg/l			
Chlorides	150mg/l			
KMnO ₄ consumption	15mg/l			

GENERAL

The water temperature at the outlet is a function of the flow rate and of the inlet temperature. The minimum flow rate per capacitor is 1.5 l/minute, and the maximum flow rate shall not exceed 12.5 l/minute. The maximum water pressure at the entrance of the cooling system of a capacitor shall not exceed 8 bar.

Cooling systems of individual capacitors may be connected in series externally (6 units maximum). The pressure drop in the cooling system must be taken into account (refer to Fig. 1). The specific electric resistance of water is the basis for defining the hose length for the conductive water lines (refer to Fig. 2).

Capacitors For Induction Equipment

CONSTRUCTION

Casing for line frequency capacitors:

steel sheet or high-quality steel sheet with multi-layer varnish RAL 7033 for a rated current < 750A, brass sheet with multi-layer varnish RAL 7033 for a rated current ≥ 750A.

Preferred bottom sizes: 345 x 135mm
345 x 175mm

Casing for medium frequency capacitors:

brass sheet with multi-layer varnish RAL 7033.

Preferred bottom sizes: 369 x 165mm
354 x 142mm

Other sizes, and a variety of mounting accessories are available upon consultation.

MKP

Metallized polypropylene film.

The dielectric consists of a single-layer of polypropylene film to which is applied an evaporated metal coating, and then wound into cylindrical elements. Electrode contacts are achieved by spraying onto the two end faces of the winding element a metal coating (= Schoop metallizing; Fig. 4).

A property of these capacitors is the self-healing effect: in case of an electric breakdown, the suddenly appearing arc evaporates the metal coating of the dielectric film in the area of the puncture. As a consequence, a non-conductive spot is created, free of metal, and the capacitor remains fully operational (Fig. 5).

General Information

Vishay ESTA

Capacitors For Induction Equipment

FILLERS

ESTAprop® = insulating oil on vegetable base, non-PCB,
flash point : 285°C
ignition point : 315°C

ESTAdry® = casting compound (resin).
The excellent heat conductivity of the resin
enables maximum capacitor loads under
high temperature stress conditions.

ESTAfilm® = non-chlorinated insulating oil, non-PCB,
high thermal stability,
good hydrogen gas-absorbing capacity,
flash point : 146°C
ignition point : 154°C

All the filling agents employed are biodegradable and
non-toxic.

A little "g" shows the difference in the type designation
between ESTAprop® (Phmkp...) and ESTAdry® (Phmkpg...).

REMARKS

Before working on a capacitor or a capacitor bank, the
equipment should be discharged and short-circuited.

Capacitors are supplied without discharging devices (unless
otherwise agreed).

Terminals should be properly tightened while observing the
maximum permissible fastening torque.

For medium-frequency applications, only connecting parts
(nuts, screws, washers) made of non-magnetic material
shall be used.

Water lines are current carrying (special versions with
insulated water lines can be supplied upon request).

Depending on the type (e.g. type Phawos), even the
casings may be current carrying (live case).

In addition, the Mounting and Maintenance Instructions
MW 110 (natural air-cooled) or MW 310 (water-cooled),
attached to all order acknowledgments, must be
observed.

Line Frequency Capacitors 50/60Hz

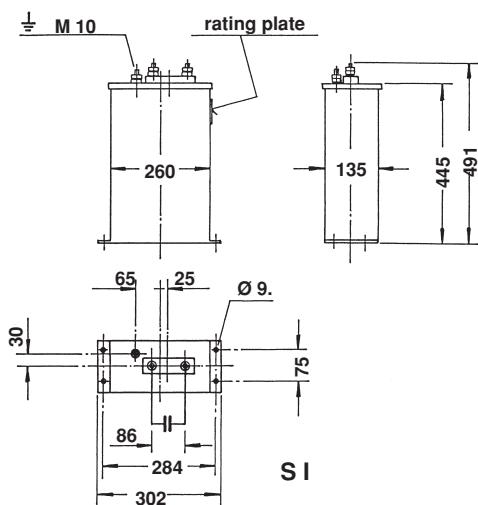

ESTAprop®, 230 - 525V, SELF-COOLING, SINGLE-PHASE

DESIGN

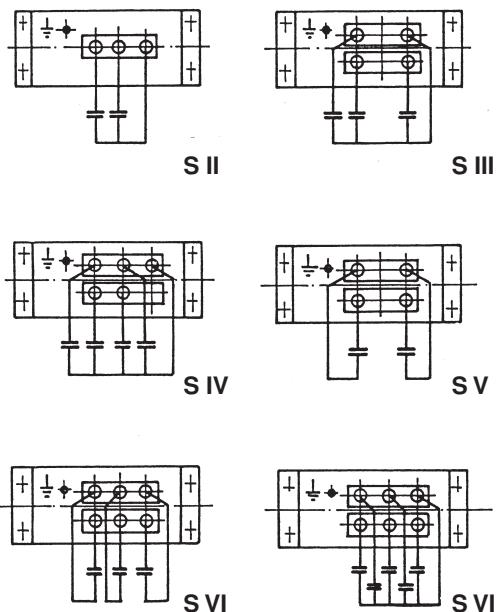

- MKP-type cup capacitor elements assembled and interconnected in steel sheet riveted casing;
- Casing varnish RAL 7033;
- IP 00, indoor, - 25°C/+ 45°C (unless otherwise confirmed);

- Self-healing, with internal overpressure tear-off fuse in each cup;
- Connection bolt M12, and grounding bolt M10;
- Mounting in the upright position, or horizontally on the narrow side.

Line Frequency Capacitors 50/60Hz

ESTAprop®/ESTAdry® 200 - 1000V, SELF-COOLING, SINGLE-PHASE

DESIGN

- MKP-type wound elements in high-quality steel sheet or brass sheet welded casing;
- Casing varnish RAL 7033;
- IP00, indoor, - 25°C/+ 45° C (unless otherwise confirmed);
- Self-healing, with overpressure switch ("DR") or tear-off fuse ("A")*, (*available only for a limited number of types!);

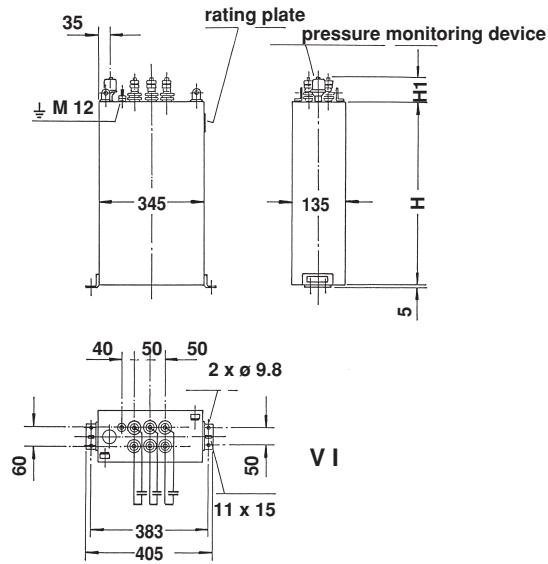

- Connection bolt M12, or M20 (depending on application current);

- Grounding bolt M12;

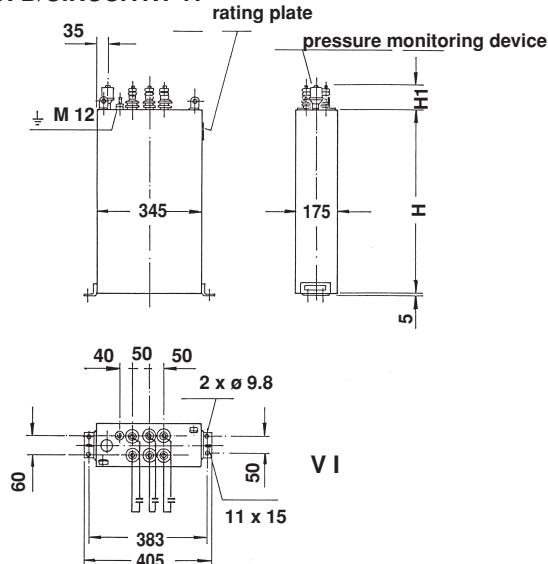

- Mounting in the upright position, or horizontally on the narrow side.

Water-cooled capacitors can be supplied upon request.

Medium Frequency Capacitors Water Cooled

ESTAfilm®, SUBDIVIDED IN PARTIAL OUTPUTS, 150 - 10000Hz

DESIGN

- All-film winding in brass sheet welded casing;
- Casing conductive, or grounded;
- Casing varnish RAL 7033;
- IP00, indoor;
- Ambient temperature 1°C 50°C;
- Outflowing water temperature 40°C maximum;
- Common terminal with 2 water-cooled current connections M20;
- Water tubing conductive;
- A maximum of 8 partial outputs with connection bolts M12 or M20 (depending on application current);
- Mounting in the upright or horizontal position;
- Upon request, temperature or pressure monitoring;

x) upon request

Medium Frequency Capacitors, Water Cooled

ESTAfilm®, TWIN OUTPUTS FOR EXTREME CURRENT LOADING, 1000 - 10000Hz

VERSION A

Total output subdivided in 2 sections of equal capacity

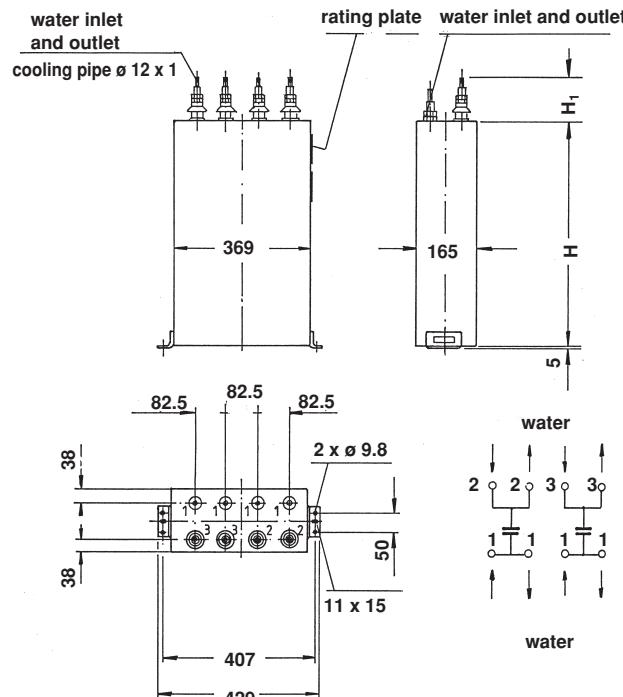

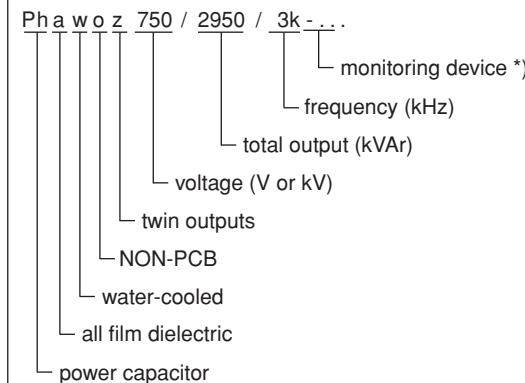

VERSION B

Total output subdivided in 2 sections of equal capacity, with one of the two sections subdivided in 6 equal-size partial outputs.

DESIGN

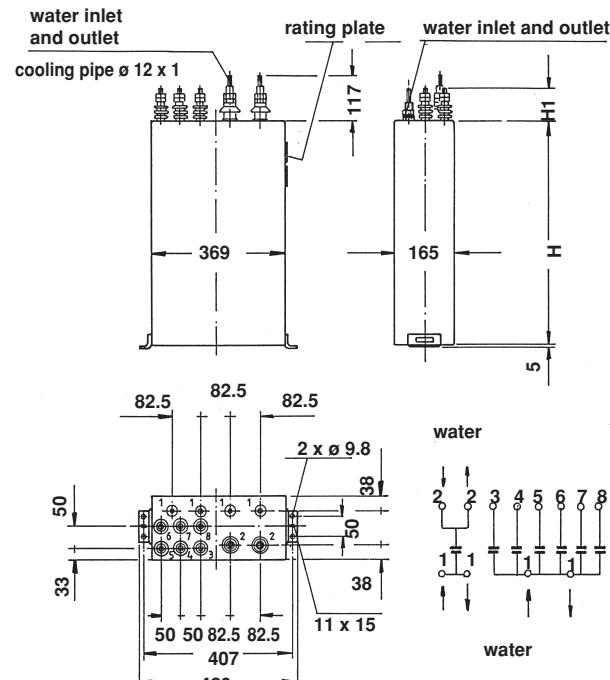

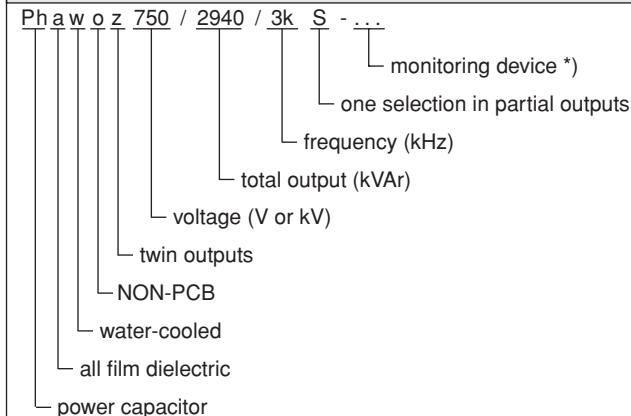

- All-film winding in brass sheet welded casing;
- Casing conductive;
- Casing varnish RAL 7033;
- IP00, indoor;
- Ambient temperature 1°C 50°C;
- Outflowing water temperature 40° C maximum;
- Water-cooled current connections M20;
- Water tubing conductive;
- Partial outputs of version B provided with connection bolts M12 or M20 (depending on application current);
- Mounting in the upright or horizontal position;
- Upon request, pressure monitoring;

Medium Frequency Capacitors, Water Cooled

ESTAfilm®, SUBDIVIDED IN PARTIAL OUTPUTS, 10000 – 100000Hz

DESIGN

- All-film windings in brass sheet welded casing;
- Extremely low-inductance version;
- Casing conductive;
- Casing varnish RAL 7033;
- 6 equal partial outputs;
- IP00, indoor;
- Ambient temperature 1°C 50°C;
- Outflowing water temperature 40°C maximum;
- Water tubing conductive;
- 4 casing connection bolts M12 x 30mm;
- Partial outputs with connection bolts M12 or M20 (depending on application current).

TYPE DESIGNATION

Phawoc 750 / 900 / 20k S

- partial outputs
- frequency (kHz)
- total output (kVAr)
- voltage (V or kV)
- special design for higher frequencies
- NON-PCB
- water-cooled
- all film dielectric
- power capacitor

Show are the maximum power ratings, other power ratings, voltages, and frequencies on request.

Medium Frequency Capacitors

MEDIUM-FREQUENCY CAPACITORS, SELF-COOLED, SMALL CAPACITIES FOR COMPLETING FRACTIONAL OUTPUTS

DESIGN

- All-film winding in insulated aluminum casing with non-magnetic lid;
- IP00, indoor;
- Operating temperature - 10°C/+ 65°C (= maximum temperature at surface of casing);
- Porcelain terminals with bolts M10;
- The maximum permissible values U_N max., P_V max., and I_{max} must be observed.

Version A

$I_{max} = 80A$
 $D1 \times H = 60 \times 109mm$

Version B

$I_{max} = 80A$
 $H = 180mm$

SMALL CAPACITORS SELF-COOLED

U_N MAX. (V)	C_N (μF)	R_S (Ohm)	P_V MAX. (W)	VERSION	TYPE Phao ...
2200	0.22	1 x 10 ⁻³	3	A	.. 2.2/0.22μF
1800	0.45	1 x 10 ⁻³	3	A	.. 1.8/0.45μF
1500	1.00	1 x 10 ⁻³	3	A	.. 1.5/1.00μF
1300	2.00	1 x 10 ⁻³	3	A	.. 1.3/2.00μF
900	4.00	1 x 10 ⁻³	3	A	.. 900/4.00μF
2200	1.00	5 x 10 ⁻⁴	9	B	.. 2.2/1.00μF
2200	1.50	5 x 10 ⁻⁴	9	B	.. 2.2/1.50μF
2200	2.00	5 x 10 ⁻⁴	9	B	.. 2.2/2.00μF
2200	3.00	5 x 10 ⁻⁴	9	B	.. 2.2/3.00μF
1800	4.00	5 x 10 ⁻⁴	9	B	.. 1.8/4.00μF

Formula for calculating P_V(W) and I(A) :

$$Q = 2 \pi f U^2 C \times 10^{-9} (\text{kVAr})$$

$$I = Q/U (\text{A})$$

$$P_V = I^2 R_S + Q \times 10^{-4} (\text{W})$$

EXAMPLE

Type Phao 1.5/1μF (= version A) on U = 1000V and f = 4000Hz ?

$$Q = 2 \pi \times 4000 \times 1000^2 \times 10^{-6} (\text{Var}) = 25130 \text{ Var}$$

$$I = 25130/1000 = 25.13 \text{ A}$$

$$P_V = 25.13^2 \times 1 \times 10^{-3} + 25130 \times 10^{-4} = 3.145 \text{ W}$$

=> version A not suitable, take version B type Phao 2.2/1μF.

VDE Prüf- und Zertifizierungsinstitut

VDE VERBAND DER ELEKTROTECHNIK
ELEKTRONIK INFORMATIONSTECHNIK e.V.

CERTIFICATE

Registration-Number: 2556/QM/03.94

This is to certify that the company

VISHAY

VISHAY ELECTRONIC GmbH
Division ESTA

at the following locations

Riegrova 1231, CZ-38801 Blatna
Pasticka 1243, CZ-38801 Blatna
Hofmark-Aich-Straße 36, D-84030 Landshut

has implemented and maintains a
Quality-Management System for the following scope:

**Heavy Current Capacitors
High Voltage Units**

This QM-System complies with the requirements of:

DIN EN ISO 9001:2000

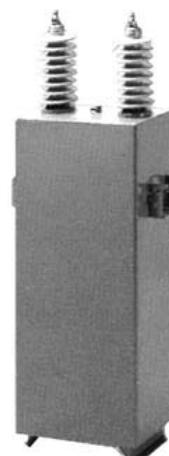

This Certificate is valid until 19.03.2006

VDE Testing and Certification Institute
Certification

D-63069 Offenbach/Main, Merianstraße 28
Date: 02.04.2003
2556-9110-0004/27625

The VDE Testing and Certification Institute is accredited by DAR Accreditation Bodies
according to DIN EN 45012 and notified in the EU under ID. No. 0366.
